Subject: Alton Coal Development, Comment for Coal Hollow Project C/025/0005

To Whom It May Concern:

I support the approval of Alton Coal (Coal Hollow Project C/025/0005) for the following reasons:

They will use the Cedar City Branch of the Union Pacific Rail Road. This 35 mile Branch of UPRR needs activity to support it's economic viability in the form that is interesting to UP management.

As one of the owners of Antelope Valley Industrial Park we can accommodate Alton Coal and many other users that are looking for rail service if rail activity raises to the level that makes sense economically

Jobs beget jobs. We need jobs.

Energy. America needs the energy.
